

PACKAGING FEES

Packaging fee is the cost that a producer pays to TMResponsibility AB ("TMR") for the collection, sorting and treatment of end-of-life packaging. The packaging fee is calculated per material type and charged as a cost per kilo of packaging material.

During 2027, municipalities in Sweden continue the expansion of kerbside collection of packaging. The collection costs that TMR and the producers pay to the Swedish Environmental Protection Agency (Naturvårdsverket) and Sweden's municipalities affect the packaging fees.

Packaging fees for paper and plastic are divided according to how recyclable the packaging material is. The easier the packaging material is to recycle, the lower the packaging fee.

TMResponsibility AB is an approved producer responsibility organisation and may not distribute profit.

REPORTING/INVOICING

On the 25th of the calendar month that follows the end of each quarter, at the latest, the Client shall report to TMR the actual packaging volume in kilograms that the company has brought to the Swedish market during the past quarter/month, according to the categories specified below. The account shall be reported on TMR's portal, <https://portal.tmr.se/>

TMR shall bill the client packaging fees on a quarterly/monthly basis in arrears, based on the received reports. The minimum debit per quarter is SEK 1 000.

TERMS OF PAYMENT

Payment must be made within 30 days from the invoice date (due date). In case of late or non-payment, TMR reserves the right to charge late payment interest and late fee in accordance with applicable law.
